

Hygiene Concept for Dancing Schools

All dancing schools must meet the following hygiene measures:

1. The valid requirement for physical distance and the valid contact limitations shall be guaranteed by these measures:
 - a. The number of persons attending shall be limited to always allow for a minimum distance of 1.5 meters. The maximum number of persons depends on the size of the available area and is 1 person per 10 sq. meters if more than 10 persons are in the facility. The following constellations are allowed in pair dance:
 - Adult social dance: private lessons with a couple from one household or permanent dance partners and a dance teacher in a hall for the duration of 45 to 60 minutes.
 - Adult social dance: lessons with limited number of participants (10 sq. meters per couple), from one household or permanent dance partners
 - b. The dance teacher has to keep the minimum distance of 1.5 meters to the dance students. A correction of the dance poses with body contact is prohibited. Seats must have a minimum distance of 1.5 m from each other. Dance pairs/single dancers must keep a distance of at least 3.0 m from each other.
 - c. Queues and gatherings must be avoided. The distance of at least 1.5 meters per person shall be marked by appropriate markings for waiting areas on the ground. Measures must be taken to control access and to maintain the distance requirement, which, where necessary, also include appropriately described path concepts as well as concepts for access control.
 - d. Sanitary areas, changing rooms and wet rooms (showers) may only be used individually. Hand washing options (with an appropriate distance from each other) must be equipped with liquid soap and disposable towels.
2. Person related measures:
 - a. Persons with symptoms of respiratory infection should be denied access.
 - b. The establishment is obliged to record the contact details (name, address and telephone number) of all visitors, the time of entering and leaving the dance school and the participation in certain courses in order to enable infections to be tracked. The contact details must be kept 1 month from the date of the visit and then destroyed in compliance with the GDPR. The data may not be used for other purposes.

- c. Cashiers and counter/bar personnel can be protected by a partition. Personnel who are protected by a partition or other suitable protective measures are exempt from the obligation to wear a mouth and nose cover..
 - d. The applicable protective measures and rules of conduct (including general rules of infection protection such as "how to sneeze correctly", classification of cold symptoms, etc.) must be identified by appropriate signs.
 - e. All persons must disinfect or wash their hands when entering the dance school. Appropriate washing facilities or disinfection dispensers must be provided by the organizer.
3. Measure to be taken at the facility:
- a. Specific measures must be taken to minimize exposure to respiratory accumulation. All rooms must be adequately ventilated
 - b. Refreshments may be served under the specifications of the gastronomy ordinance.
 - c. In the restrooms, the applying hygiene regulations must be to be made available. Regular cleaning must be ensured and sufficient disinfectants must be made available.
 - d. Hand sanitizers, liquid soap and disposable towels must be provided in sanitary, common and break rooms
4. In general this applies:
- a. In order to comply with the regulations, a designated person must be appointed on site.
 - b. Persons who are not willing to comply with the following rules must be denied access within the right of owner.
 - c. Furthermore, in justified individual cases, the responsible authority may, on request, allow exceptions or issue other hygiene requirements, if a requirement under CoBeLVO is not mandatory, the level of protection appears comparable and the purpose of the CoBeLVO is respected.
