Vehicle Recalls: Prior to turn in, customers are responsible for ensuring their vehicle does not have an unresolved "Recall Notice". Vehicle Owners can verify if their vehicles have a recall notice at the following link: <https://vinrcl.safercar.gov/vin/>. Customers should also print a report (documented proof) from this webpage on the status of recalls associated with their vehicle. Service members can also contact their servicing VPC to determine if their particular vehicle will be accepted for shipment or storage. If there's a recall on a vehicle, owners must provide documented proof of repair by a certified mechanic/dealership (authorized by the manufacturer).
